Commands:

```
PS1> choco install minikube
```

```
$ brew cask install minikube
```

```
$ minikube version
```

```
PS1> minikube start --vm-driver hyperv --cpus 4 --memory 8192
```

```
$ minikube start --vm-driver virtualbox --cpus 4 --memory 8192
```

```
$ minikube addons list
```

```
$ minikube addons enable dashboard
```

```
$ minikube addons enable ingress
```

```
$ kubectl version
```

```
$ kubectl config get-contexts
```

```
$ kubectl config current-context\
```

```
$ kubectl config use-context minikube
```
