Commands:

```
$ docker run -it --rm gcr.io/google-containers/python:3.5.1-slim
```

```
>>> print(open('/etc/os-release').read())
```

```
>>> exit()
```

```
$ docker images --digests python
```

```
$ docker run python:latest
```

```
$ docker pull python:2.7.16-stretch
```

```
$ docker images django-polls
```

```
$ docker push django-polls:uwsgi4nginx
```

```
$ docker tag django-polls:uwsgi4nginx pythonincontainers/django-polls:uwsgi4nginx
```

```
$ docker push pythonincontainers/django-polls:uwsgi4nginx
```

```
$ docker tag django-polls:db-universal pythonincontainers/django-polls:db-universal
```

```
$ docker tag django-polls:postgres pythonincontainers/django-polls:postgres
```

```
$ docker tag django-polls:mariadb pythonincontainers/django-polls:mariadb
```

```
$ docker images pythonincontainers/django-polls
```

```
$ docker push pythonincontainers/django-polls
```

Python in Containers Course Materials

```
$ docker login
```
