Python in Containers Course Materials

Section 3. "Dockerfile Commands – ENV, LABEL, USER"

```
Commands:
Dockerfile.var:
FROM python
ENV NEW hello
$ docker build -t var -f Dockerfile.var .
$ docker run --rm var env
$ docker run --rm --env NEW="hi there" var env
$ export NEW="Mamma mia"
$ docker run --rm --env NEW var env
$ unset NEW
$ docker run --rm --env NEW var env
Dockerfile.user:
FROM python
RUN groupadd mysql && useradd -g mysql mysql
USER mysql
RUN id
$ docker build -t user -f Dockerfile.user .
$ docker run --rm user id
Dockerfile.label:
FROM python
LABEL maintainer=kris@mycompany.com
LABEL com.mycompany.version="0.7"
LABEL com.mycompany.production="true"
```

Python in Containers Course Materials

\$ docker build -t label -f Dockerfile.label .
\$ docker inspect -f "{{json .Config.Labels}}" label
\$ docker images --filter "label=com.mycompany.production"
\$ docker images --filter "label=com.mycompany.production=true"
