Commands:

```
$ git clone https://github.com/pythonincontainers/multistage

$ cd multistage

$ docker build -t factors_flask:cython-multi -f
Dockerfile.cython-multi .

$ cd ..

$ git clone https://github.com/pythonincontainers/simpletests

$ cd simpletests

$ atom .

$ docker build -t factors_flask:tester -f Dockerfile.tester --
build-arg BaseImage=factors_flask:cython-multi .

$ docker run -it --rm -v ${PWD}:/data factors_flask:tester

$ docker build -t factors_flask:debug -f Dockerfile.debug --
build-arg BaseImage=factors_flask:cython-multi .

$ docker run -it --rm -p 5000:5000 factors_flask:debug
```
